Cancer Genomics | **Machine Learning** | **Bioinformatics** | **Computer Vision** | **Data Science**

Education

PhD in Computer Science (Bioinformatics), UC San Diego
NSF Graduate Research Fellow (Fall 2025 – Present)
Summer 2023 – Spring 2027

Academic Advisor: Vineet Bafna, Professor of Computer Science, Bioinformatics and Systems Biology
GPA: 3.96 / 4.00

- **Focus:** Applied Machine Learning for Bioinformatics
- **Relevant Courses:** Deep Learning, Bioinformatics Algorithms, Population Genomics, Generative AI Modeling, Recommender Systems

Bachelor of Science, Bioinformatics: UC San Diego
Fall 2020 - Spring 2023

Major: Bioinformatics (B.S.), Minor: Computer Science
GPA 3.97/4.0

- **Relevant Courses:** Machine Learning, Molecular Sequence Analysis, Probability & Statistics, Linear Algebra, Data Structures, Algorithms

Experience

Computational Biology & Machine Learning Intern
Jun 2025 - Aug 2025

Genentech Research & Development (gRED Computational Sciences)

- Developing a **predictive framework** combining **in vitro dose-response data** with pharmacokinetics to estimate **in vivo drug efficacy**.
- Analyzed **immunofluorescence** and **live-cell imaging** data in cancer cell lines to evaluate **drug efficacy** and cellular response dynamics.
- Extending published pharmacokinetic models to analyze clinically relevant drug combinations.
- **Technical Skills:** QSP modeling, PK/PD and dose-response analysis, single-cell data analysis, machine learning, Python, Git.

Machine Learning & Bioinformatics Researcher
Jun 2022 - Current

UC San Diego Bafna Lab

- Developed **Computer Vision** Models for FISH (Fluorescence in Situ Hybridization) Spatial Transcriptomics Data.
- Predicts **tumor amplification status** (ecDNA/HSR) in Cancer Cell Lines and Patient Tissue Images.
- **Technical Skills:** Tensorflow, OpenCV, Numpy, Pandas, Python, Linux, Git.
- Web development for AmpliconRepository, a Public Web Database of Oncogene Amplifications using NGS data.
- **Technical Skills:** Cloud Computing, Statistical Analysis, Database querying using MongoDB and Python's SQLite3.

Computational Biology & Machine Learning Research Assistant
Oct 2021 - Jun 2023

UC San Diego Yeo Lab

- Built a **Convolutional Neural Network** for Spatial Transcriptomics Image data, to perform **nuclear segmentation**.
- Used a **U-Net Architecture** to predict nuclei boundaries, bypassing the need for DAPI staining.
- **Technical Skills:** Tensorflow, Keras, NumPy, Pandas, Pytorch, PyLab, Python, Linux, Git.

Software Engineering Intern
Jun 2021 - Aug 2021

Dotdash

- Designed front-end software for Dotdash, the largest digital publisher in the US, managing sites like Investopedia and Verywell Health.
- Developed cross-platform web applications in a collaborative environment using Agile/Scrum.
- **Technical Skills:** JavaScript, Vue, HTML, SASS, Maven, Database querying, APIs.

Phage Genomics Research Initiative
Oct 2020 - Jun 2021

UC San Diego Pogliano Lab

- Created a BLAST parser website using Google App Engine and Python (GitHub), used by the UCSD professor and class.
- Queries the NCBI BLAST data to perform comparative genomic analysis of Bacteriophage genes with unknown functions.
- **Technical Skills:** Flask, Python, HTML, Google Cloud App Engine.

Achievements

June 2025	**NSF Graduate Research Fellowship**, Awarded for Outstanding Achievement in Bioinformatics Research	*National Science Foundation (NSF)*
Oct 2024	**Cancer Grand Challenge eDynamic Conference**, Presented a Computer Vision Model for Cancer Imaging	*Cancer Grand Challenge (NCI)*
Oct 2024	**Cancer Grand Challenge Future Leaders Speaker**, Presented on AI applications in Cancer Research	*Cancer Grand Challenge (NCI)*
June 2023	**Summa Cum Laude Honors**, Awarded for Exceptional GPA.	*UC San Diego*
April 2023	**Undergraduate Research Conference**, Presented on Computer Vision methods for FISH Imaging.	*UC San Diego*
Jul 2020	**UCSD BioScholars Honors Society Member**, Awarded membership based on academic achievement.	*UC San Diego*

Skills

Bioinformatics	Research Focus in **Cancer Genomics**: Mechanisms and Modeling of Tumor Resistance.
Machine Learning	Experience With **Transformer Architectures**, **Convolutional Neural Networks**, and **ResNet Autoencoders**.
Programming	Python (PyTorch, Tensorflow, Keras, Pandas, NumPy), R, C++, Cloud Computing, Bash, Linux, Git, JavaScript, Java, SQL.

Mentoring

2023 - 2024	**Data Science Capstone Mentor**, Mentored 3 Data Science undergrads in a Computer Vision capstone competition to semantically segment cell imaging data using deep learning.	*UC San Diego*
2023 - 2024	**Early Research Scholars Program Mentor**, Mentored 2 Computer Science undergrads in a project to extract mutational signatures from The Cancer Genome Atlas (TCGA) genome sequencing data.	*UC San Diego*

Personal Projects

Autotune Implementation Using Phase Vocoder

github.com/GinoP123/AutotunePV.git *May 2023*
- Created an autotuner from scratch using Phase Vocoders and Yin pitch prediction.
- Able to autotune any audio clip to a specific major or minor scale using Hann window functions.
- Examples of popular songs autotuned here.

Custom Search Engine for Linux File System

github.com/GinoP123/FileSearch *Jul 2022*
- Created a keyword-matching search engine with caching fully from scratch using dynamic programming.
- Added learning capability by including popularity and relevance weights.
- I personally use this tool all the time, and find it a huge time-saver for navigating in Linux.
