Machine Learning | Bioinformatics | Computer Vision | Cancer Genomics | Data Science

Education

PhD in Computer Science, UC San Diego (Graduating Spring 2027)

Fall 2023 – Spring 2027

NSF Graduate Research Fellow (Fall 2025 – Present)

Academic Advisor: [Vineet Bafna](#), Professor of Computer Science, Bioinformatics and Systems Biology

GPA: 3.97 / 4.0

- **Focus:** Applied Machine Learning
- **Relevant Courses:** Deep Learning, Generative AI Modeling, Algorithms, Recommender Systems, Population Genomics

Bachelor of Science, Bioinformatics: UC San Diego

Fall 2020 - Spring 2023

Major: Bioinformatics (B.S.), Minor: Computer Science

GPA: 3.97 / 4.0

- **Relevant Courses:** Machine Learning, Probability & Statistics, Genomics Research Lab, Linear Algebra, Data Structures, Algorithms

Experience

Machine Learning Engineering Intern

Jun 2026 - Sep 2026

TikTok Privacy and Data Protection Office

- Engineered a synthetic video generation pipeline with **Seedance 2.0** using factor-level metadata to bypass data-retention limits.
- **Fine-tuned Qwen3-VL** (SFT) on false-positive and synthetic false-negative data to improve video classification.
- Deployed **Qwen3-VL** and **Whisper** pipelines to EU infrastructure, resolving mesh, shared memory, and package constraints.
- **Technical Skills:** Vision-Language Models (VLMs), Video Gen (Seedance 2.0), SFT, Qwen3-VL, Whisper.

Data Science & Machine Learning Intern

Jun 2025 - Aug 2025

Genentech Research & Development (gRED Computational Sciences)

- Implemented an **LLM agent system** with **LangChain** for natural language querying and analysis of large-scale cell-line screening datasets.
- Trained ML models (LightGBM, Transformer Attention Networks) to predict **drug dose-response** from gene expression and cell line embeddings.
- Utilized **SHAP** for model interpretability, gaining insights into drug potency and **mechanisms of action**.
- **Technical Skills:** LLM Agents, HPC, LangChain, Deep Learning, Transformers, PyTorch, LightGBM, SHAP

Machine Learning Graduate Researcher

Jun 2022 - Current

UC San Diego Bafna Lab

- Developed interSeg, an **AI Computer Vision** Model for identifying biomarkers in cancer patient imaging data, achieving high predictive accuracy.
- Codeveloped AmpliconChatbot, an **agentic AI** using the Biomni Framework for Scaling Cancer Genetics Research
- Co-authored **EvidenceBench**, a benchmark for assessing LLM reasoning performance on biomedical papers.
- **Technical Skills:** Nautilus GPU Cluster (HPC), PyTorch, Tensorflow, OpenCV, Skimage, Pandas

Computational Biology & Machine Learning Research Assistant

Oct 2021 - Jun 2023

UC San Diego Yeo Lab

- Built a **Convolutional Neural Network** for Spatial Transcriptomics Image data, to perform **nuclear segmentation**.
- Used a **U-Net Architecture** to predict nuclei boundaries, bypassing the need for DAPI staining.
- **Technical Skills:** Tensorflow, Keras, NumPy, Pandas, Pytorch, PyLab, Python, Linux, Git.

Software Engineering Intern

Jun 2021 - Aug 2021

Dotdash

- Designed front-end software for Dotdash, the largest digital publisher in the US, managing sites like Investopedia and Verywell Health.
- Developed cross-platform web applications in a collaborative environment using Agile/Scrum.
- **Technical Skills:** JavaScript, Vue, HTML, SASS, Maven, Database querying, APIs.

Achievements

June 2025	NSF Graduate Research Fellowship , Awarded for Outstanding Achievement in ML/Bioinformatics Research	<i>National Science Foundation (NSF)</i>
Oct 2024	Cancer Grand Challenge eDynamic Conference , Presented a Computer Vision Model for Cancer Imaging	<i>Cancer Grand Challenge (NCI)</i>
Oct 2024	Cancer Grand Challenge Future Leaders Speaker , Presented on AI applications in Cancer Research	<i>Cancer Grand Challenge (NCI)</i>
June 2023	Summa Cum Laude Honors , Awarded for Exceptional GPA.	<i>UC San Diego</i>
April 2023	Undergraduate Research Conference , Presented on Computer Vision methods for FISH Imaging.	<i>UC San Diego</i>
Jul 2020	UCSD BioScholars Honors Society Member , Awarded membership based on academic achievement.	<i>UC San Diego</i>

Skills

Machine Learning	Experience With Transformer Architectures , Convolutional Neural Networks , and ResNet Autoencoders .
Bioinformatics	Research Focus in developing AI Models for Cancer Genomics and Tumor Modeling.
Programming	Python (PyTorch, Tensorflow, Keras, Pandas, NumPy), R, C++, Cloud Computing, Bash, Linux, Git, JavaScript, Java, SQL.

Mentoring

2023 - 2024	Data Science Capstone Mentor , Mentored 3 Data Science undergrads in a Computer Vision capstone competition to semantically segment cell imaging data using deep learning.	<i>UC San Diego</i>
2023 - 2024	Early Research Scholars Program Mentor , Mentored 2 Computer Science undergrads in a project to extract mutational signatures from The Cancer Genome Atlas (TCGA) genome sequencing data.	<i>UC San Diego</i>

Personal Projects

Autotune Implementation Using Phase Vocoder  github.com/GinoP123/AutotunePV.git - Created an autotuner from scratch using Phase Vocoders and Yin pitch prediction. - Able to autotune any audio clip to a specific major or minor scale using Hann window functions. - Examples of popular songs autotuned here.	<i>May 2023</i>
Custom Search Engine for Linux File System  github.com/GinoP123/FileSearch - Created a keyword-matching search engine with caching fully from scratch using dynamic programming. - Added learning capability by including popularity and relevance weights. - I personally use this tool all the time, and find it a huge time-saver for navigating in Linux.	<i>Jul 2022</i>
